

Electronic pressure switch type 540

Pressure range
0 ... 60 – 600 bar

The μ P-regulated, programmable pressure transmitter type 540 has a robust industry design. The parameters are easily adjustable with two function keys in the configuration menu which disposes of up to two programmable switching points.

All systems are equipped with a diagnostic function. The large 4 digit LED display assures a good accuracy of reading. The pressure switch type 540 is based upon the Huba Control developed thick film technology where the pressure measuring cell is fully welded.

- Compact, rugged construction
- High over pressure
- Clearly readable display
- Sensitive operation keys
- Diagnostic function
- with analogue signal available
- by up to 2 programmable switching outputs
